- Signs Reuse Neon cans and fascia
- Mercury Free
- Long Life 7-15 years that's less waste in the land fills
- No Infrared, No Ultraviolet, No Glare, No Heat, No Radiation

LED Signage

World of Lights offers a full turnkey sign system from design through manufacture to installation and then servicing all types of signage including pylon style and exterior building signs.

We specialize in new fabrications and retrofitting/ upgrading existing neon signs with LED.

We tackle projects with all types and styles of letters and designs from small, 3 feet or less, to pylon signs over 35 feet tall.

We work at any height using boom trucks or swing stages for multi storey sky scrapers as necessary. No project is too large. or too small.

	Repair Neon	Retrofit to LED
Advantages	<ul style="list-style-type: none"> • Lower Initial Cost but only if it's a "small job" • Neon has been around a long time, it's a known technology 	<ul style="list-style-type: none"> • Dramatically increased reliability and long life, will not dull - no service calls for years! • Increased efficiency - Reduce your energy use by up to 90% • Re-Use existing cans and fascias • Low Voltage System—removes fire risk • Lower Cost compared to a new sign
Disadvantages	<p>It's only a Temporary Fix</p> <ul style="list-style-type: none"> • Neon is inefficient • Neon dulls over time • Neon dulls in cold weather • High voltage transformers required - another point of failure • Transformers are dangerous - Fire hazard 	<p>In many cases the cost of a complete LED Retrofit equals the cost of just 2 service calls to fix the existing Neon sign!</p>

Neon Before

Size: 14.5ft x 85ft
 Payback : 2 Years
 Savings: \$6,000 /yr
